Original labelling (text)

The cream effectively inhibits the aging process of the skin and obviously reduces wrinkles. The combination of innovative active ingredients with high-quality vegetable oils, advanced skin moisturizers and antioxidants provides a long-lasting skin lifting effect. The cream deeply moisturizes and strengthens the skin structure. Deep skin moisturizers molecules – actively absorb water and guarantee skin moisturizing for 74 hours. While the lactic acid normalizes process, improves skin moisturizing and its elasticity, promoting the synthesis of “intercellular substance”. The natural sources of silicon in the product increase the level of hydroxyproline - an amino acid – in the tissues, affecting the synthesis of fibres of connecting tissues. The vitality of the connective tissue and its ability to absorb water is restored. Rich combination of antioxidants effectively combats free radicals, stimulates the synthesis of collagen.
